WHO?

About Us

ANECTEAM

National Association of Highly Migratory Species Marketing and Processing Companies

Our objectives

Cooperation between companies to promote the FIP

Transfer to the public opinion the commitment to the sustainability of the industry.

Promote a collective image of good practices.

Implement measures to improve sustainability.

Collaboration commitment at various levels: public administrations and environmental organizations.

ESPADEROS DEL ATLÁNTICO, S.A.

OBJECTIVES

Bring the fishery to more recognizable sustainability standards

Guarantee access to all markets for the catches of this fleet and differentiate itself from the fleets of third countries with lower standards.

Improve scientific knowledge of fisheries and collaborate with the scientific community

Ensuring a sustainable, responsible and internationally recognized surface longline fishery

Search for new partners and Stakeholders public and private

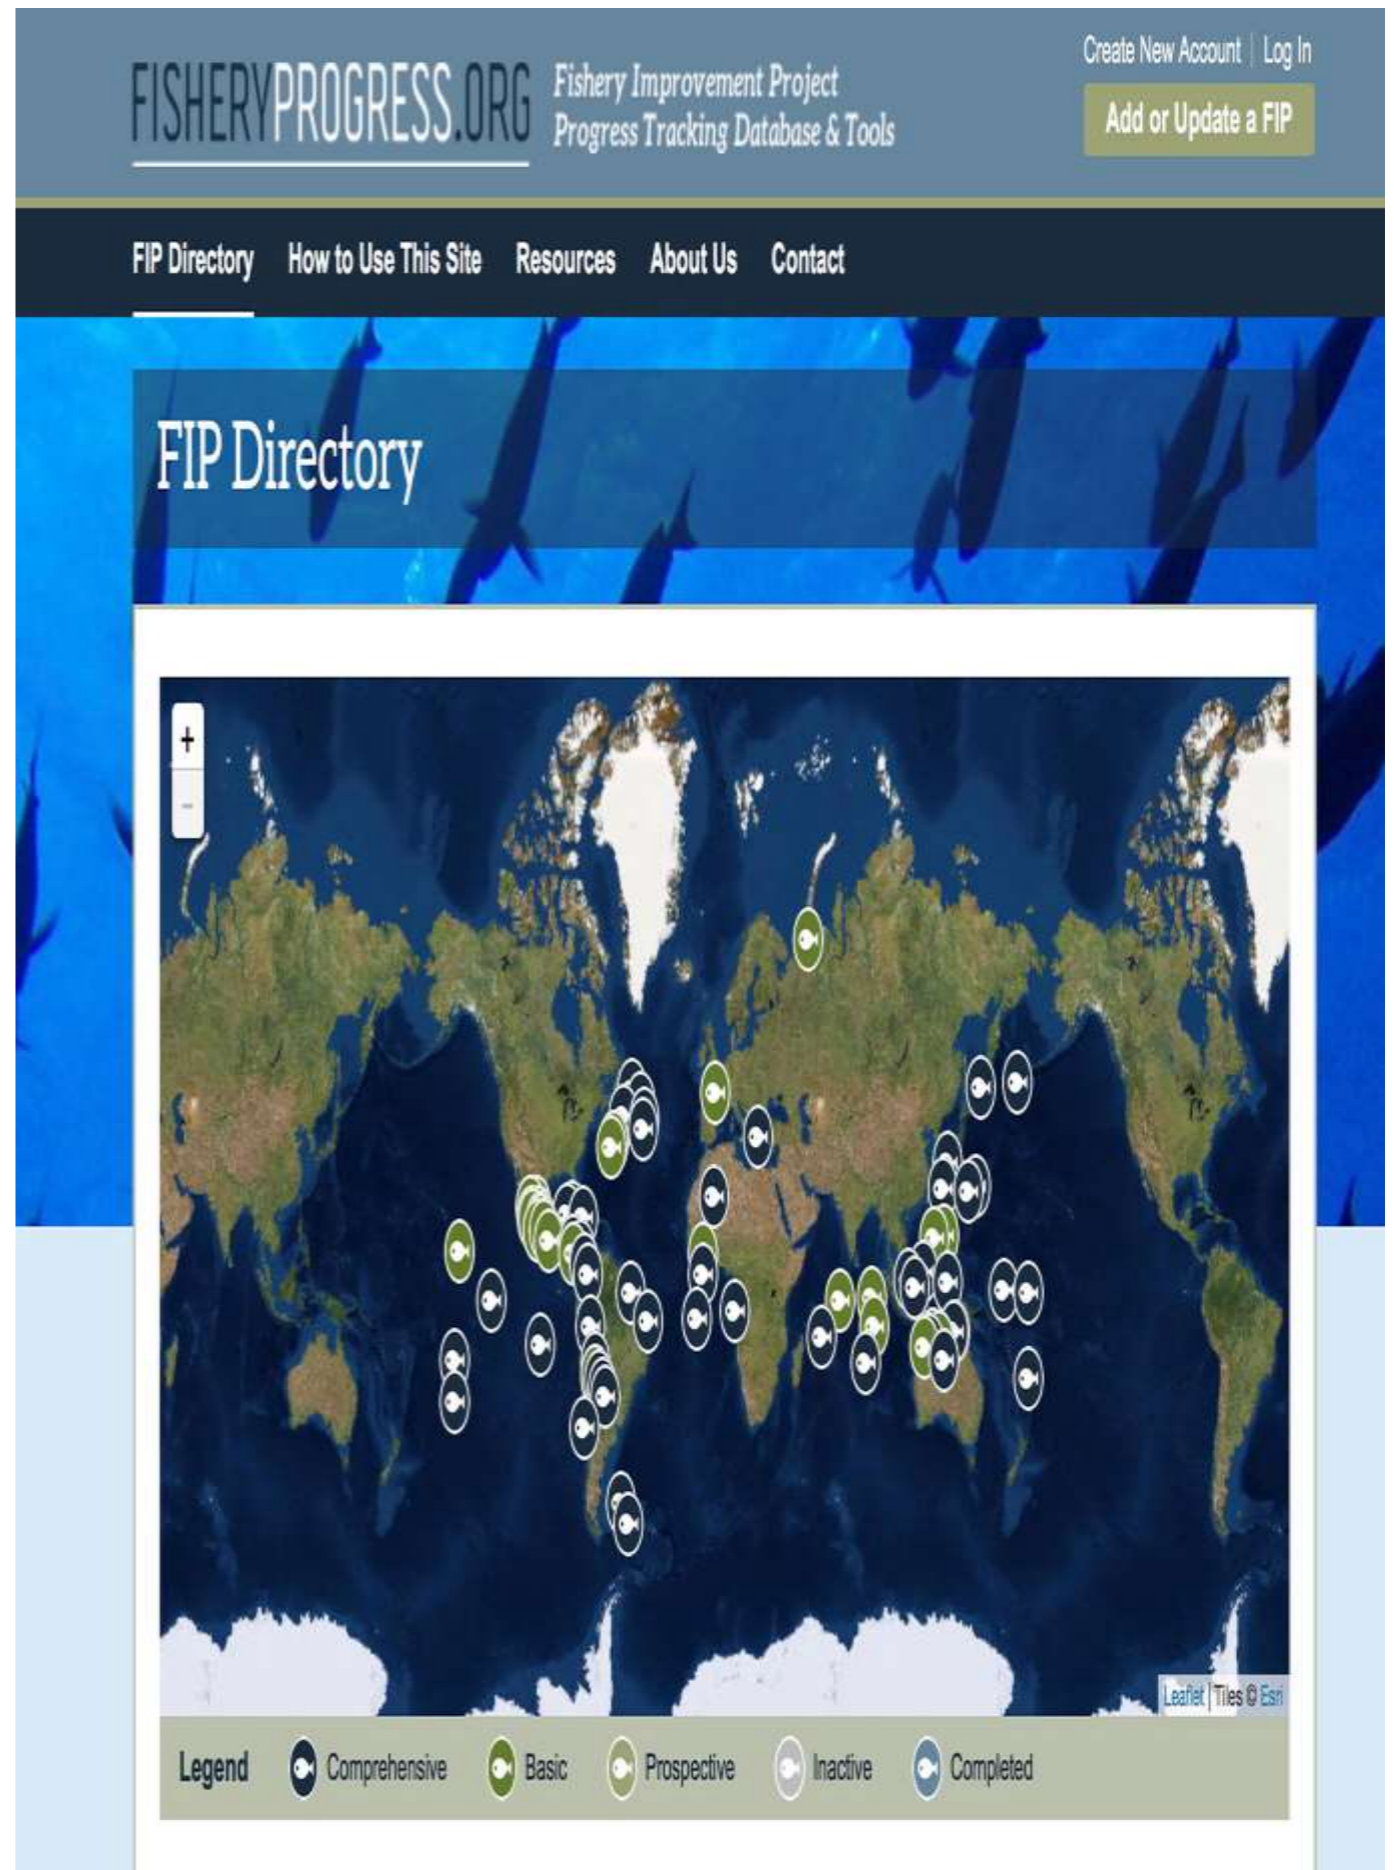

Reference Standards

- ✓ Tools and methodologies based on the MSC standard to measure fishery performance and progress over time
- ✓ Monitoring and control by “Fishery Progress” (evaluator)

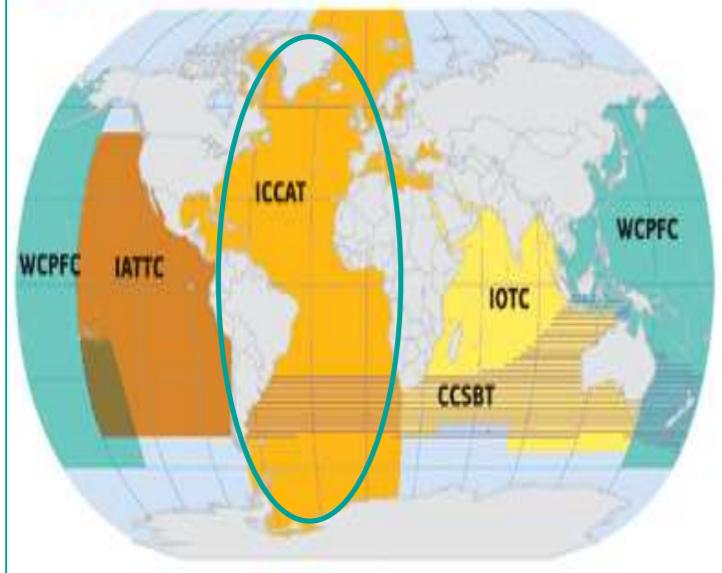

**FISHERY
PROGRESS.ORG**

The screenshot shows the website **FISHERYPROGRESS.ORG** with the tagline "Fishery Improvement Project Progress Tracking Database & Tools". Navigation links include "FIP Directory", "How to Use This Site", "Resources", "About Us", and "Contact". A "Create New Account | Log In" link and an "Add or Update a FIP" button are also visible. The main content area features a "FIP Directory" section with a world map displaying various fishery locations. A legend at the bottom identifies the status of each fishery: Comprehensive (fish icon), Basic (green circle with fish icon), Prospective (green circle with fish icon), Inactive (grey circle with fish icon), and Completed (blue circle with fish icon).

RFMOs for highly migratory fish stocks
(tuna and associated species)

UNIT OF ASSESSMENT (UoA) BASED ON MSC DEFINITION

Target Species	Sword Fish : (Xiphias gladius) Blue Shark : (Prionace glauca)
Stock(s)	North and South Atlantic
Fishing Method or Gear Type	Surface Longline
Fishing Fleet or group of vessels of individual fishing operators pursuing stock	European Fleet- UE

ACTION

1

A Harvest and Management strategy – FIP tasks and Interaction with ICCAT (SCRS and scientists)

ACTION

2

To address information-data gaps for fishery related species (mako and ETPs)

ACTION

3

To increase and maintain On Board Observers coverage and improvement of the current reporting scheme

ACTION

4

To develop and trial “Mitigation Techniques “ and implementation of good practises on board

Thanks!
