

GLOBAL DEAL FOR NATURE & PEOPLE

Mobilizing Efforts for an Ambitious
Post-2020 Biodiversity Agreement

The collapse of biodiversity...

58%

of the **global populations of fish, birds, mammals, amphibians and reptiles disappeared between 1970 and 2012.**
This figure should reach two thirds by 2020.

6th

Mass extinction

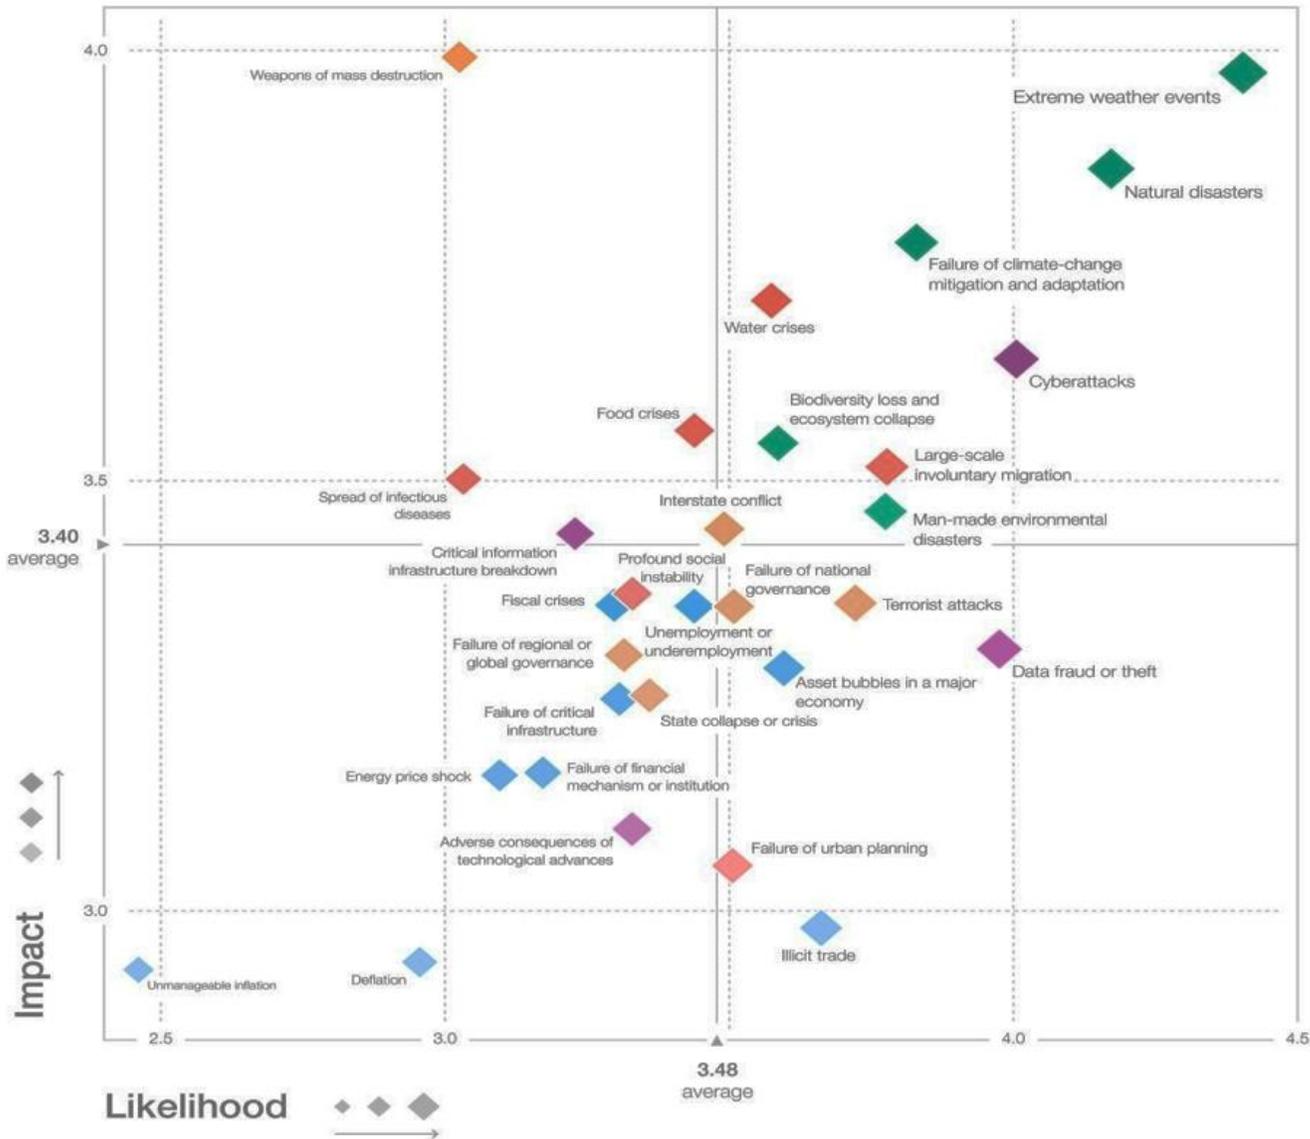

The first one since the disappearance of the dinosaurs.

... a threat to all of us...

8/10

of the most likely and impactful risks are environment-related, according to the World Economic Forum

GLOBAL DEAL FOR NATURE & PEOPLE

The EU needs to be exemplary

- By supporting an **ambitious Beijing Agreement** with **voluntary commitments** and **ratcheting mechanism**

The EU needs to be exemplary

- By ensuring a **50% target for environment and climate** in the next EU budget
- By **mainstreaming environment and climate** throughout all the EU policies including CAP
- By **investing in non-bankable projects**, in the EU and abroad, which protect the **global public good that is biodiversity**
- By **stopping subsidies** harmful to biodiversity
- By putting environment and climate at the **heart of the future EU leaders priorities**
