TO LOCAL**

TRAFFIC'S MISSION IS
**TO ENSURE TRADE IN WILD SPECIES IS LEGAL AND SUSTAINABLE,
FOR THE BENEFIT OF THE PLANET AND PEOPLE**

By 2030, illegal and unsustainable trade in wild species will be significantly reduced

By 2030, legal and sustainable trade in wild species will provide significantly increased social, economic, and environmental benefits to people

GOALS

BY 2030

INTERGOVERNMENTAL AGREEMENTS

Prioritised global and regional intergovernmental agreements have been strengthened to promote legal and sustainable trade in wild species

NATIONAL GOVERNMENTS

Governments in priority geographies are effectively implementing regulations and policies for improved governance of trade in wild species, and prevention and responses to illegal wild species trade

COMMUNITIES

People in prioritised supply chains and geographies have improved livelihoods through from legal and sustainable trade and in wild species

BUSINESSES

Businesses in target sectors implement new or strengthened best practices to verify responsible supply chains and reduce illegal wild species trade

CONSUMERS

Consumption of illegal and unsustainable wild species products in target consumer groups is reduced

OBJECTIVES

STRENGTHENING

LIVELIHOOD AND CONSERVATION IMPACTS

- Enterprise-oriented forest management
- Devolving authority to manage the harvests to communities through the establishment of CFUGs
- The FairWild certification - consumer confidence
- Fairer prices enhance livelihood benefits without compromising ecological sustainability.

TOWARDS SUSTAINABLE USE AND TRADE IN WILD SPECIES

- **Sustainable** use and trade in wild species provides an important contribution to conservation of species and ecosystems, and multiple socio-economic co-benefits
- The development of policy frameworks needs to actively involve IP and LC, ensuring their full participation and engagement in decision-making processes
- A range of regulatory and non-regulatory measures can support implementation at local, national and global levels
- Important to integrate/consider benefits and costs of wildlife use and trade along the value chains: for people living with wildlife, for other 'users'
- Indicators for the measurement and adaptive management of use and trade need to be developed, rooted in the national-level metrics
- There are multiple opportunities for scaling-up good practices and solutions
